

'Aunt Ada's Treehouse'

Adaptations

This module was deployed during a Fall term when 52 students took the class; during the following Spring term ~110 students took the class, in four sections. A different version of this module was deployed for that term to change the assignment somewhat (i.e. to prevent material sharing/recycling among students) and to adopt some of the lessons learned from the Fall deployment of Aunt Ada's Treehouse. Interested users of this module should therefore also consider the module submitted by Webb that is titled, "Uncle Asa's Urban Abode". Lastly, during the Fall term one year later from when Aunt Ada's Treehouse was first debuted, a shortened version of the module was deployed that had only three parts, as described in the Instructor Tips section of this module.
